

booksales2.csv

----- for human eyes only ------

Hello there. I am a very weird CSV file, because...

- 1. I use * as the quoting character not "
- 2. I use TAB ("\t") as the separating character not ,
- 3. I don't have a header at all
- 4. The first 8 lines of the file need to be skipped
- 5. Missing data are specified using the string NFI.
